### **Requirements for Boarding**

**Vaccinations:** Proof of current vaccinations is required for any pet that overnights with us. The following vaccinations are required:

- Bordetella (kennel cough)
- Distemper
- Parvo
- Leptospirosis
- Rabies

If your pet is not up to date on these vaccines, he/she will not be allowed to stay with us.

**Flea Medication:** All pets boarded at Rex's Place Boarding House are required to be treated for fleas with a prescription strength product. If any fleas are noticed on your pet, Rex's Place Boarding House will treat your pet with the treatment of our choice (depending on your dogs weight) and the cost will be applied to your balance.

**Heartworm/Intestinal Parasite Medication:** All pets staying at Rex's Place Boarding House are required to be on a heartworm prevention plan to protect not only your dog but also the other dogs staying with us. Please provide proof of purchase of your heartworm prevention medicine and a negative heartworm test us within 24 hours of your stay.

Behavior: For the safety of our staff and other guests, Rex's Place Boarding House reserves the right to refuse to board any animal that is deemed to be overly aggressive or is seen as having severe behavioral problems.

Consent Forms and Information Forms: Owners are required to fill out and complete all necessary forms for their pet to overnight with us.

Food: Our boarding rates do not include furnishing food for your pet. To be honest, there are so many allergies out there, we believe it is best for your dog to stay on his own food during his stay. We require using Zip-Lock bags with pre-measured portions for every meal. Please make sure to pack some extra portions in case your stay has to be extended

If your dog has to eat a special food just tell us what it is, how we should keep it (e.g. refrigerate) and we are good to go.

Medication: Pet Owners are required to provide all medication needed for the duration of your dogs stay. If you use a special food or treat to administer medications to your pet, please make sure you bring those with you. If your pet's medication is a controlled substance, the owner as well as the staff, to verify quantities, will count the medication. We will only accept the amount of controlled substance needed for the duration of your pup's stay.

If your pet requires insulin injections, you are required to supply the insulin as well as syringes and needles for the duration of your pet's stay plus a couple of extra days in case your dog's stay is extended. In order to more closely monitor the eating, drinking and bathroom habits of a dog with diabetes. They will be required to board by themselves.
